

## **A Collection of Cocktails**

The '.typ' file is the Source of Truth. It's a Typst document. The PDF is simply this document, typeset.

It uses the `in-dexter` package for manual indexing, which is available in the Typst Universe.

### **The Collection**

The cocktails in this collection are hand-gathered by an erratic process of chasing rabbit holes. Among of these rabbit holes, one or two deal with drinking in particular settings in Hollywood's distant past.

Some liberties have been taken, as the document explains; and, obviously, for many cocktails there are multiple subtle or not so subtle variations, sometimes vehemently championed by factions well dug-in in that trench on that hill they've chosen to die on. Choices have been made, but nothing's written in stone. Play around.
